EDUCATION

Brigham Young University, Provo, UT — Currently Enrolled

August 2022 - April 2027

- Undergraduate in Computer Science
- Software Engineering focus

RELEVANT COURSE WORK

- Artificial Intelligence, Algorithm Design, Software Design, Adv Software Construction, Systems Programming, Data Structures, Deep Learning, Dev Ops, Discrete Structures, Web Programming

EXPERIENCE

BYU AI-Human Interaction Lab, Provo, UT — *Research Assistant*

January 2024 - Current

- Researching AI in **multi-agent** environments
- Spearheaded new projects in **leadership roles**
- Researching human and **AI behavior** in societies
- Development of **web applications** for research

Prototype Machining Lab, Provo, UT — *Machinist*

August 2022 – December 2023

- Became proficient in manual and CNC machining

PROJECTS

<https://github.com/DallinJacksonE>

Kaylie'sCreations, 2026 — Full stack project. Fully functioning web store that automated the sales process for a small business. Built with Typescript, React, MySQL, MinIO s3 Buckets, and a Docker deployment. kayliescreations.com

Research Web Application, 2026 — Full stack project, created a new Social Dilemma study for work measuring AI behaviors. Built in Typescript, React, Python, and MySQL. Solved challenging deployment with Docker containers. [See more](#)

EMS Casio Watch, 2026 — Embedded programming, used C to write firmware for a CASIO fw-91 watch to make a CPR cycle tool for an EMT friend. Swapped out CASIO components for the custom chip that the firmware was written for. [See more](#)

Music Generation Transformer, 2026 — AI Engineering Project, built to take a base genre of music and finish training with a secondary genre to blend the two. Built an AI pipeline with automated validation and overfitting prevention.

3D Tron, 2026 — Project for learning 3D game development and Odin programming language. [See more](#)

Personal Site, 2025 — Frontend Project, static site djackson.dev. Self hosted on home linux server, cut hosting costs by 95%. Built with Typescript, React, Hosted with Cloudflare tunnel and Docker Deployment.
