EDUCATION

Brigham Young University, Provo, UT — Currently Enrolled

August 2022 - December 2026

- Undergraduate in Computer Science
- Software Engineering focus

RELEVANT COURSE WORK

- Artificial Intelligence, Algorithm Design, Software Design, Adv Software Construction, Systems Programming, Data Structures, Deep Learning, Dev Ops, Discrete Structures, Web Programming

EXPERIENCE

BYU AI-Human Interaction Lab, Provo, UT — Research Assistant

January 2024 - Current

- Researching AI in **multi-agent** environments
- Spearheaded new projects in **leadership roles**
- Researching human and AI **behavior** in societies
- Development of **web applications** for research

Prototype Machining Lab, Provo, UT — Machinist

August 2022 – December 2023

- Became proficient in manual and CNC machining

PROJECTS

<https://github.com/DallinJacksonE>

Research Web Application, 2026 — Full Stack project, created a new Social Dilemma study for work measuring AI behaviors. Built in Typescript, React, and MySQL. Made challenging usage seamless with Docker Deployment.

Go Multiplayer Web Application, 2026 — Full Stack Project, Chess.com for Go (wéiqí). Personal project exploring python backends. Build with Python, Javascript, React, MySQL

Reversi AI Agent, 2025 — AI Engineering Project, AI Player Agent using Alpha Beta Pruning and Minmax with Heuristic. Built for AI class in Java, tied for first in class showdown.

Personal Site, 2025 — Frontend Project, static site djackson.dev. Self hosted on home linux server, cut hosting costs by 95%. Built with Javascript, React, Hosted with Cloudflare tunnel and Docker Deployment.

Kaylie's Creations, 2024 — Full Stack Project. Fully functioning web store that automated the sales process for a small business. Built with React, Javascript, MongoDB, AWS Deployment.

Robotic Simulator, 2024 — AI Engineering Project, ProfRL learning environment to train learning algorithms for robotics. Built with Python.
